MIELE. FOR EVERYTHING YOU REALLY LOVE.

IMMER BESSER

Professional, beautiful and convenient. The full culinary suite by Miele.

Impress and indulge your guests with a memorable dining experience this holiday season.

Miele's complete range of built-in kitchen appliances integrates seamlessly into your home without compromising on performance and results, so you and your loved ones can enjoy the best of holiday feast in the comforts of your home.

Sous-vide

Miele brings professional sous-vide cooking into your home by using a Miele vacuum-sealing drawer with variable vacuum settings in conjunction with the Miele steam oven. Adjust temperatures to a precision of 1°C and use it to slow cook up to 10 hours.

TempControl Induction Hobs

Miele induction hobs sense and detect the characteristics of the material and temperature of the pan, regulating power automatically to ensure that the food is subject to a uniform and constant temperature. This means that even when the oil in the pan is sizzling hot, you will never run the risk of burning your food.

MoisturePlus

Miele ovens offer moisture-assisted cooking. Bursts of steam are automatically introduced in critical stages of cooking to ensure that you get crisp outsides and succulent insides whether you are baking a loaf of bread or roasting a cut of meat. Also available as a manual programme for seasoned users.
